Online Portfolio: [sjmoosavinia.github.io/](https://sjmoosavinia.github.io/)

## EXPERIENCE

- Current **Test and Automation Analyst, Cornish Mutual Assurance (January 21 – Present)**
- Sole tester responsible for fulfilling all the testing needs for an 8-person development team, building inhouse and customer facing web applications for an agricultural insurance company
  - Designed and implemented entire testing process, which has since been adopted as standard in the development team. Reported business critical bugs to developers to ensure adherence to strict FCA regulations and GDPR requirements
  - Created suites of automated regression tests to run in continuous integration pipelines, aiding the adoption of agile working practices for the development team
  - Liaise with business owners and project managers to collect specific software requirements and create comprehensive user stories
  - Work closely with development team, demonstrating close collaboration, communication skills and interdisciplinary insight to bridge the technical gap between developers and end users
- Current **Accounts Assistant, APCOps Ltd. (October 14 – Present, part-time)**
- Accountancy role within small business, responsible for managing cashbook and invoices
- 2019 **Creative Co-Director, The Real Maple Company (September 19 – November 19, part-time)**
- Oversaw sales of products through seller profiles, organised shipment of products and designed digital marketing campaigns reaching over 10,000 consumers in a 3-week period
  - Built company website taking into consideration user experience and responsive web design
- 2018 - 19 **Senior Surf Instructor, Go Ride A Wave, Australia (November 18 - July 19)**
- Managed teams of 6 instructors, leading classes of 50 students for Australia's largest surf school
  - Demonstrated leadership and co-operation skills to deliver lessons ensuring client safety
  - Provided excellent customer service, achieving a 100% customer satisfaction record, and won Best New Instructor of the Year award

## SOFTWARE DEVELOPMENT SKILLS

- Manual software testing through all stages of development, writing test cases using BDD principles, executing tests, and assessing readiness of builds for production
- Automation testing with **Selenium (PHP and C#)** and **Cypress (JavaScript)** managing versions using **GIT** concepts
- Experience querying databases in **SQL**
- Agile development practices, user story design, stand ups, sprint planning, sprint reviews, managing tasks through **Kanban** boards using **Azure DevOps** and **Gitlab**
- Basic **C#** and **Python** building programs for online courses and analysing data during research projects, basic web design using **HTML, CSS**

## EDUCATION

- 2022 **British Computing Society, ISTQB Foundation Level Tester**
- Certified foundation level tester completing 3-day course covering testing fundamentals, test techniques, and test management
  - Gained a 90% pass mark and became an associate member of the British Computing Society
- 2014 - 17 **Imperial College, London, BSc Geology 2.1**
- Conducted scientific research projects, lab work, and extensive fieldwork in the UK and abroad
  - Additional courses taken in: Python Programming, Corporate Finance, and Arabic
- 2012 - 14 **Truro School**
- **A-Levels:** A A A B A (Maths, Chemistry, Geology, Biology, Extended Project Qualification (EPQ))

## ADDITIONAL EXPERIENCE

- Current **Volunteer Surf Mentor, The Wave Project (2016 – Present)**
- Mentor to disadvantaged children, providing a safe and fun learning environment
- 2020 **Environmental Consultant Intern, GetEnsignt (November 2020 – February 2021)**
- Worked on delivery of carbon footprint calculations and strategies to reduce carbon impact

## OTHER INTERESTS
